#### CLIFFORD F. EVERS TO HEAD COLLEGE PARK LABORATORY

Clifford F. Evers, of Millburn, N. J., was named today to head the U. S. Fishery Technological Laboratory at College Park, Md., Milton C. James, Acting Director of the Fish and Wildlife Service announced.

Formerly technical director of the National Association of Frozen Food Packers, Mr. Evers will replace Dr. L. A. Sandholzer, who died in June. He was graduated from the University of Michigan in 1929 with a B.S. degree in chemistry.

A member of the American Chemical Society, the Institute of Food Technologists, the American Society of Refrigerating Engineers, and the American Public Health Association, Mr. Evers was employed for many years by the General Foods Corporation, directing research and production of frozen and canned foods.

As head of the Fishery Technological Laboratory in College Park, Md., Mr. Evers will be in charge of six research projects: the determination of food values of cooked fishery products; the correlation of biological and spectrophotometric methods for determining vitamin A potencies; the determination of the rate of digestion of certain fishery products; the preparation of canned sandwich spreads for the school lunch program; the effect of fluctuating temperatures on the quality of frozen fish in storage and transit; and the identification of micro-organisms causing spoilage of fish and shellfish.
